Are you looking for a lightweight, portable, high quality 3D plantar surface scanner?

Our iQube mini allows you to quickly and consistently create an accurate 3D model of your patient’s plantar foot surface whether it be in your facility or out in the field.

At only 6kg in weight, our iQube mini 3D scanner is designed to be completely portable allowing your customers to complete their consultations anywhere.

The iQube mini is able to capture a fast and accurate full colour 3D scan of the patient’s foot via a button within the software or a foot pedal included.

Our job management software enables the complete order including the aligned scans and a digital prescription to be automatically transferred to the laboratory.

“This is simply the best portable scanner on the market”

Luke Sinclair, Owner, DOLA Digital Orthotic Laboratories, Australia

- iQube mini has been designed to be the only scanner available that can capture foot scans, foam box and cast impressions
- The only scanner available that is able to capture weight-on, weight-off and semi-weight bearing scans
- Within 3 seconds the iQube mini is able to deliver high quality 3D images to an accuracy of 1mm (Accuracy of unprocessed scanned data)
- iQube mini is developed and supported by a large and well established CADCAM company with over 300 employees and over 80 offices worldwide
**Superior data quality**
- iQube mini accurately captures the full plantar form of your patient’s feet
- When scanning your foam boxes and casts, the iQube mini will capture the deepest of cavities including undercuts

**Data Types**
iQube mini is able to capture all types of data – foot, foam box and cast

**Flexibility**
You have the ability to capture weight-on, weight-off and semi-weight bearing foot scans

**Fast and accurate**
The completed scans are accurate to within 1mm and can be retrieved within seconds

**Portable**
Our iQube mini scanner is lightweight and portable, but we supply an adapter bracket should you want to mount the scanner on a tripod.

**Data Types**
iQube mini is able to capture all types of data – foot, foam box and cast.

**Accuracy**
- +/- 1mm
**Speed**
- 3 seconds
**Weight**
- 6kg
**Size**
- 54cm x 29cm x 8cm
- 21.25” x 11.5” x 3.15”

**Scanner interface**
iQube mini includes a scanning interface enabling you to capture patient data and create a digital prescription.

**Flexibility**
You have the ability to capture weight-on, weight-off and semi-weight bearing foot scans.

**Workflow management**
iQube mini links directly with our OrderManager workflow software to seamlessly transfer order data from your customer to your manufacturing facility.

**OrderManager**
OrderManager enables you to manage all your production steps while giving you and your customers live updates on your entire manufacturing process.

**Facts and figures**
iQube mini is fast, lightweight and accurate.
